AIR ADJUSTING VALVE

Model: AAV4059

Motor Guard has introduced a high-quality air adjusting valve designed for the precise control of air pressure entering the paint spray gun or other critical air tool. The Model AAV4059 Air Adjusting Valve features a tapered needle/seat that is finely engineered to provide a smooth adjustment between fully closed and fully open with an infinite range in between.

The Motor Guard Air Adjustment Valve is proven to provide superior performance to more commonly available gate valves. Additional features of the AAV4059 include an oversized, knurled adjustment knob that is designed for ease of use while wearing gloves and an easy-to-read, dual scale pressure gauge that features a solvent-proof glass lens.

Features:

1. *Tapered Needle Valve for Smooth Adjustment.*
2. *Oversized, Knurled Adjustment Knob*
3. *Dual-Scale Pressure Gauge with Glass Lens*
4. *HVLP Approved*
5. *Durable Construction*
6. *Backed by Motor Guard's 1-Year Limited Warranty*

Specifications:

Inlet Port Size: 1/4 NPS (Male)
Outlet Port Size: 1/4 NPT (Female Swivel)
Maximum Inlet Pressure: 160 PSI
Outlet Pressure Range: 0-160 PSI
Operating Temperature Range: 40-180 °F
